Pain 124 (2006) 366–370

PAIN

www.elsevier.com/locate/pain

Subject Index to Volume 124 (2006)

2-Arachidonyl-2-chloroethylamide
Induction of CB_1 cannabinoid receptor by inflammation in primary afferent neurons facilitates antihyperalgesic effect of peripheral CB_1 agonist **124**, 175
5-HT_{2A} receptors
Topical ketanserin attenuates hyperalgesia and inflammation in arthritis in rats **124**, 27
830nm
The effect of 300mW, 830nm laser on chronic neck pain: A double-blind, randomized, placebo-controlled study **124**, 201
Acceptance
Investigating acceptance in adjustment to chronic pain: Is acceptance broader than we thought? **124**, 269
Acute back pain
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
Acute pain
Parental history of chronic pain may be associated with impairments in endogenous opioid analgesic systems **124**, 287
Acute pain
The evaluation of acute pain in individuals with cognitive impairment: A differential effect of the level of impairment **124**, 312
Adjustment
Investigating acceptance in adjustment to chronic pain: Is acceptance broader than we thought? **124**, 269
Albumin extravasation
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Algometer
Decreased sensitivity to self-inflicted pain **124**, 134
Allodynia
Attenuation of capsaicin-evoked mechanical allodynia by peripheral neuropeptide Y Y_1 receptors **124**, 167
Allodynia
Sensory neuropathy and signs of central sensitization in patients with peripheral arterial disease **124**, 190
Amitriptyline
Amitriptyline suppresses neuroinflammation and up-regulates glutamate transporters in morphine-tolerant rats **124**, 77
Amputation
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
Analgesia
Analgesic activity of a non-peptide imidazolidinedione somatostatin agonist: In vitro and in vivo studies in rat **124**, 34
Analgesia
Assessment of persistent pain or distress and adequacy of analgesia in preterm ventilated infants **124**, 87
Anti-nociception
Analgesic activity of a non-peptide imidazolidinedione somatostatin agonist: In vitro and in vivo studies in rat **124**, 34
Anxiety disorders
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117
Arthritis
Topical ketanserin attenuates hyperalgesia and inflammation in arthritis in rats **124**, 27
Astrocytes
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Attention
Focused hypnotic analgesia: Local and remote effects **124**, 280
Augmentation mammoplasty
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Back beliefs
Fear-avoidance beliefs about back pain in patients with subacute low back pain **124**, 305
Behavior
The evaluation of acute pain in individuals with cognitive impairment: A differential effect of the level of impairment **124**, 312
Beliefs
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
Blood–spinal cord barrier permeability
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Blood pressure
Stimulating the human midbrain to reveal the link between pain and blood pressure **124**, 349
Breast surgery
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Cannabinoid
Induction of CB_1 cannabinoid receptor by inflammation in primary afferent neurons facilitates antihyperalgesic effect of peripheral CB_1 agonist **124**, 175
Capsaicin
Analgesic activity of a non-peptide imidazolidinedione somatostatin agonist: In vitro and in vivo studies in rat **124**, 34
Capsaicin
Attenuation of capsaicin-evoked mechanical allodynia by peripheral neuropeptide Y Y_1 receptors **124**, 167
Caspr
Increased sodium channel immunofluorescence at myelinated and demyelinated sites following an inflammatory and partial axotomy lesion of the rat infraorbital nerve **124**, 222

doi:10.1016/S0304-3959(06)00444-1

CB_1
Induction of CB_1 cannabinoid receptor by inflammation in primary afferent neurons facilitates antihyperalgesic effect of peripheral CB_1 agonist **124**, 175
Cervical spine
Physical therapy and active exercises – An adequate treatment for prevention of late whiplash syndrome?. Randomized controlled trial in 200 patients **124**, 69
Cheating detection mechanism
Testing two accounts of pain underestimation **124**, 109
Chloroquine
Influence of genotype, dose and sex on pruritogen-induced scratching behavior in the mouse **124**, 50
Chronic ischemia
Sensory neuropathy and signs of central sensitization in patients with peripheral arterial disease **124**, 190
Chronic pain
Investigating acceptance in adjustment to chronic pain: Is acceptance broader than we thought? **124**, 269
Chronic pain
Parental history of chronic pain may be associated with impairments in endogenous opioid analgesic systems **124**, 287
Chronic pain
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
Chronic postoperative pain
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Chronic widespread pain
A twin study of posttraumatic stress disorder symptoms and chronic widespread pain **124**, 150
Clinical practice guidelines
Evidence-based practice for acute low back pain in primary care: Patient outcomes and cost of care **124**, 140
Cognitive impairment
The evaluation of acute pain in individuals with cognitive impairment: A differential effect of the level of impairment **124**, 312
Community study
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117
Comorbidity
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117
Complex regional pain syndrome
Severity and specificity of neglect-like symptoms in patients with complex regional pain syndrome (CRPS) compared to chronic limb pain of other origins **124**, 184
Conditioning
How prior experience shapes placebo analgesia **124**, 126
Conservative treatment
Physical therapy and active exercises – An adequate treatment for prevention of late whiplash syndrome?. Randomized controlled trial in 200 patients **124**, 69
Coping
The role of pain coping strategies in prognosis after whiplash injury: Passive coping predicts slowed recovery **124**, 18
Coping
Muscle pain in myophosphorylase deficiency (McArdle's disease): The role of gender, genotype, and pain-related coping **124**, 295
Cosmetic surgery
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Cost of care
Evidence-based practice for acute low back pain in primary care: Patient outcomes and cost of care **124**, 140
COX-2 inhibitor
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Deafferentation
Sensory neuropathy and signs of central sensitization in patients with peripheral arterial disease **124**, 190
Deep brain stimulation
Stimulating the human midbrain to reveal the link between pain and blood pressure **124**, 349
Demyelination
Increased sodium channel immunofluorescence at myelinated and demyelinated sites following an inflammatory and partial axotomy lesion of the rat infraorbital nerve **124**, 222
Depression
The role of pain coping strategies in prognosis after whiplash injury: Passive coping predicts slowed recovery **124**, 18
Depression
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117
Depression
Investigating acceptance in adjustment to chronic pain: Is acceptance broader than we thought? **124**, 269
Descending
Midbrain control of spinal nociception discriminates between responses evoked by myelinated and unmyelinated heat nociceptors in the rat **124**, 59
Disability
Investigating acceptance in adjustment to chronic pain: Is acceptance broader than we thought? **124**, 269
Dorsal root ganglia
Induction of CB_1 cannabinoid receptor by inflammation in primary afferent neurons facilitates antihyperalgesic effect of peripheral CB_1 agonist **124**, 175
Dysfunction
Parental history of chronic pain may be associated with impairments in endogenous opioid analgesic systems **124**, 287
EMG
Midbrain control of spinal nociception discriminates between responses evoked by myelinated and unmyelinated heat nociceptors in the rat **124**, 59
Endogenous opioids
Parental history of chronic pain may be associated with impairments in endogenous opioid analgesic systems **124**, 287
Endurance
Muscle pain in myophosphorylase deficiency (McArdle's disease): The role of gender, genotype, and pain-related coping **124**, 295
Epidemiology
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117
Expectation
How prior experience shapes placebo analgesia **124**, 126
Facial expression
Testing two accounts of pain underestimation **124**, 109
FACS
The evaluation of acute pain in individuals with cognitive impairment: A differential effect of the level of impairment **124**, 312
Family history
Parental history of chronic pain may be associated with impairments in endogenous opioid analgesic systems **124**, 287
Fear-avoidance beliefs
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
Fibromyalgia
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117

Fibromyalgia
A twin study of posttraumatic stress disorder symptoms and chronic widespread pain **124**, 150
Fibromyalgia
Mechanisms underlying development of spatially distributed chronic pain (fibromyalgia) **124**, 242
Formalin test
Endogenous nociceptin/orphanin FQ signalling produces opposite spinal antinociceptive and supraspinal pronociceptive effects in the mouse formalin test: Pharmacological and genetic evidences **124**, 100
Functional outcome
Evidence-based practice for acute low back pain in primary care: Patient outcomes and cost of care **124**, 140
GaAlAs
The effect of 300mW, 830nm laser on chronic neck pain: A double-blind, randomized, placebo-controlled study **124**, 201
Gender
Explaining sex differences in chronic musculoskeletal pain in a general population **124**, 158
General population
Explaining sex differences in chronic musculoskeletal pain in a general population **124**, 158
General practice
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
General practitioners
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
Genetic
Influence of genotype, dose and sex on pruritogen-induced scratching behavior in the mouse **124**, 50
Genetic
A twin study of posttraumatic stress disorder symptoms and chronic widespread pain **124**, 150
Genotype–phenotype correlation
Muscle pain in myophosphorylase deficiency (McArdle's disease): The role of gender, genotype, and pain-related coping **124**, 295
Glial fibrillary acidic protein immunoreactivity
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Glucocorticoid
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Glutamate
Effects of subcutaneous administration of glutamate on pain, sensitization and vasomotor responses in healthy men and women **124**, 338
Glutamate transporters
Amitriptyline suppresses neuroinflammation and up-regulates glutamate transporters in morphine-tolerant rats **124**, 77
Histamine
Influence of genotype, dose and sex on pruritogen-induced scratching behavior in the mouse **124**, 50
Human skin
Effects of subcutaneous administration of glutamate on pain, sensitization and vasomotor responses in healthy men and women **124**, 338
Hyperesthesia
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Hypnotic analgesia
Focused hypnotic analgesia: Local and remote effects **124**, 280
Hypnotic location
Focused hypnotic analgesia: Local and remote effects **124**, 280
Hypoesthesia
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Inflammation
Analgesic activity of a non-peptide imidazolidinedione somatostatin agonist: In vitro and in vivo studies in rat **124**, 34
Inflammation
Induction of CB_1 cannabinoid receptor by inflammation in primary afferent neurons facilitates antihyperalgesic effect of peripheral CB_1 agonist **124**, 175
Inflammatory pain
Analgesic activity of a non-peptide imidazolidinedione somatostatin agonist: In vitro and in vivo studies in rat **124**, 34
Intrathecal
Amitriptyline suppresses neuroinflammation and up-regulates glutamate transporters in morphine-tolerant rats **124**, 77
Ischemic pain
Sensory neuropathy and signs of central sensitization in patients with peripheral arterial disease **124**, 190
Ischemic pain
Mechanisms underlying development of spatially distributed chronic pain (fibromyalgia) **124**, 242
Itch
Influence of genotype, dose and sex on pruritogen-induced scratching behavior in the mouse **124**, 50
J-113397
Endogenous nociceptin/orphanin FQ signalling produces opposite spinal antinociceptive and supraspinal pronociceptive effects in the mouse formalin test: Pharmacological and genetic evidences **124**, 100
Knockout mice
Endogenous nociceptin/orphanin FQ signalling produces opposite spinal antinociceptive and supraspinal pronociceptive effects in the mouse formalin test: Pharmacological and genetic evidences **124**, 100
Learning
How prior experience shapes placebo analgesia **124**, 126
Local hypnotic analgesia
Focused hypnotic analgesia: Local and remote effects **124**, 280
Longitudinal
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
Low back pain
Evidence-based practice for acute low back pain in primary care: Patient outcomes and cost of care **124**, 140
Low back pain
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
Lower extremity
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
Low-level laser therapy (LLLT)
The effect of 300mW, 830nm laser on chronic neck pain: A double-blind, randomized, placebo-controlled study **124**, 201
Mammography
Decreased sensitivity to self-inflicted pain **124**, 134
McArdle's disease
Muscle pain in myophosphorylase deficiency (McArdle's disease): The role of gender, genotype, and pain-related coping **124**, 295
McGill Pain Questionnaire
Stimulating the human midbrain to reveal the link between pain and blood pressure **124**, 349
Mechanonociception
Decreased sensitivity to self-inflicted pain **124**, 134
Methods
Mechanical sensory threshold testing using nylon monofilaments: The pain field's "Tin Standard" **124**, 13

Minority women
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117
Morphine tolerance
Amitriptyline suppresses neuroinflammation and up-regulates glutamate transporters in morphine-tolerant rats **124**, 77
Muscular pain
Mechanisms underlying development of spatially distributed chronic pain (fibromyalgia) **124**, 242
Muscuskeletal pain
Explaining sex differences in chronic musculoskeletal pain in a general population **124**, 158
Narcotics
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
NCCPC-R
The evaluation of acute pain in individuals with cognitive impairment: A differential effect of the level of impairment **124**, 312
Neck pain
The effect of 300mW, 830nm laser on chronic neck pain: A double-blind, randomized, placebo-controlled study **124**, 201
Neglect-like syndrome
Severity and specificity of neglect-like symptoms in patients with complex regional pain syndrome (CRPS) compared to chronic limb pain of other origins **124**, 184
Nerve lesion
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Neurogenic inflammation
Attenuation of capsaicin-evoked mechanical allodynia by peripheral neuropeptide Y Y_1 receptors **124**, 167
Neuronal damage
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Neuropathic pain
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Newborn
Assessment of persistent pain or distress and adequacy of analgesia in preterm ventilated infants **124**, 87
Nociceptin/orphanin FQ
Endogenous nociceptin/orphanin FQ signalling produces opposite spinal antinociceptive and supraspinal pronociceptive effects in the mouse formalin test: Pharmacological and genetic evidences **124**, 100
Nociception
Midbrain control of spinal nociception discriminates between responses evoked by myelinated and unmyelinated heat nociceptors in the rat **124**, 59
Nociception
Induction of CB_1 cannabinoid receptor by inflammation in primary afferent neurons facilitates antihyperalgesic effect of peripheral CB_1 agonist **124**, 175
Nodes of Ranvier
Increased sodium channel immunofluorescence at myelinated and demyelinated sites following an inflammatory and partial axotomy lesion of the rat infraorbital nerve **124**, 222
NOP receptors
Endogenous nociceptin/orphanin FQ signalling produces opposite spinal antinociceptive and supraspinal pronociceptive effects in the mouse formalin test: Pharmacological and genetic evidences **124**, 100
NPY
Attenuation of capsaicin-evoked mechanical allodynia by peripheral neuropeptide Y Y_1 receptors **124**, 167
Observer estimate
Testing two accounts of pain underestimation **124**, 109
Outcome measure
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
Outcome measures
Fear-avoidance beliefs about back pain in patients with subacute low back pain **124**, 305
PAG
Stimulating the human midbrain to reveal the link between pain and blood pressure **124**, 349
Pain
Attenuation of capsaicin-evoked mechanical allodynia by peripheral neuropeptide Y Y_1 receptors **124**, 167
Pain
Muscle pain in myophosphorylase deficiency (McArdle's disease): The role of gender, genotype, and pain-related coping **124**, 295
Pain
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
Pain
Effects of subcutaneous administration of glutamate on pain, sensitization and vasomotor responses in healthy men and women **124**, 338
Pain
Stimulating the human midbrain to reveal the link between pain and blood pressure **124**, 349
Pain assessment
Assessment of persistent pain or distress and adequacy of analgesia in preterm ventilated infants **124**, 87
Pain testing
Mechanical sensory threshold testing using nylon monofilaments: The pain field's "Tin Standard" **124**, 13
Pain threshold
Decreased sensitivity to self-inflicted pain **124**, 134
Pain threshold
Decreased sensitivity to self-inflicted pain **124**, 134
Pain tolerance
Decreased sensitivity to self-inflicted pain **124**, 134
Pain underestimation
Testing two accounts of pain underestimation **124**, 109
Parental history
Parental history of chronic pain may be associated with impairments in endogenous opioid analgesic systems **124**, 287
Patient satisfaction
Evidence-based practice for acute low back pain in primary care: Patient outcomes and cost of care **124**, 140
Periaqueductal grey
Midbrain control of spinal nociception discriminates between responses evoked by myelinated and unmyelinated heat nociceptors in the rat **124**, 59
Periaqueductal grey
Stimulating the human midbrain to reveal the link between pain and blood pressure **124**, 349
Peripheral arterial disease
Sensory neuropathy and signs of central sensitization in patients with peripheral arterial disease **124**, 190
Peripheral mechanism
Topical ketanserin attenuates hyperalgesia and inflammation in arthritis in rats **124**, 27
Peripheral sensitization
Analgesic activity of a non-peptide imidazolidinedione somatostatin agonist: In vitro and in vivo studies in rat **124**, 34
Physical therapy
Physical therapy and active exercises – An adequate treatment for prevention of late whiplash syndrome?. Randomized controlled trial in 200 patients **124**, 69

Placebo analgesia
How prior experience shapes placebo analgesia **124**, 126
Posttraumatic stress disorder
A twin study of posttraumatic stress disorder symptoms and chronic widespread pain **124**, 150
Premature infant
Assessment of persistent pain or distress and adequacy of analgesia in preterm ventilated infants **124**, 87
Primary care
Evidence-based practice for acute low back pain in primary care: Patient outcomes and cost of care **124**, 140
Pro-inflammatory
Amitriptyline suppresses neuroinflammation and up-regulates glutamate transporters in morphine-tolerant rats **124**, 77
Psychiatric disorder
Psychiatric comorbidities in a community sample of women with fibromyalgia **124**, 117
Psychophysics
Mechanical sensory threshold testing using nylon monofilaments: The pain field's "Tin Standard" **124**, 13
Quantitative sensory testing
Sensory neuropathy and signs of central sensitization in patients with peripheral arterial disease **124**, 190
Randomized controlled trial
Physical therapy and active exercises – An adequate treatment for prevention of late whiplash syndrome?. Randomized controlled trial in 200 patients **124**, 69
RCT
The effect of 300mW, 830nm laser on chronic neck pain: A double-blind, randomized, placebo-controlled study **124**, 201
Reconstruction
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
Remote hypnotic analgesia
Focused hypnotic analgesia: Local and remote effects **124**, 280
Risk factors
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Self-efficacy
Investigating acceptance in adjustment to chronic pain: Is acceptance broader than we thought? **124**, 269
Self-inflicted pain
Decreased sensitivity to self-inflicted pain **124**, 134
Self-injury
Decreased sensitivity to self-inflicted pain **124**, 134
Sensory changes
Chronic pain and sensory changes after augmentation mammoplasty: Long term effects of preincisional administration of methylprednisolone **124**, 92
Sex
Explaining sex differences in chronic musculoskeletal pain in a general population **124**, 158
Sex difference
Effects of subcutaneous administration of glutamate on pain, sensitization and vasomotor responses in healthy men and women **124**, 338
Sodium channel
Increased sodium channel immunofluorescence at myelinated and demyelinated sites following an inflammatory and partial axotomy lesion of the rat infraorbital nerve **124**, 222
Soft collar
Physical therapy and active exercises – An adequate treatment for prevention of late whiplash syndrome?. Randomized controlled trial in 200 patients **124**, 69
Spinal
Midbrain control of spinal nociception discriminates between responses evoked by myelinated and unmyelinated heat nociceptors in the rat **124**, 59
Spinal cord microenvironment
Spinal nerve lesion alters blood–spinal cord barrier function and activates astrocytes in the rat **124**, 211
Stimulus intensity
Focused hypnotic analgesia: Local and remote effects **124**, 280
Strain difference
Influence of genotype, dose and sex on pruritogen-induced scratching behavior in the mouse **124**, 50
Subacute low back pain
Fear-avoidance beliefs about back pain in patients with subacute low back pain **124**, 305
Survey
Fear-avoidance beliefs about back pain in patients with subacute low back pain **124**, 305
Survey
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain **124**, 330
Sympathetic vasoconstriction
Mechanisms underlying development of spatially distributed chronic pain (fibromyalgia) **124**, 242
Trauma
Prevalence of chronic pain seven years following limb threatening lower extremity trauma **124**, 321
Topical application
Topical ketanserin attenuates hyperalgesia and inflammation in arthritis in rats **124**, 27
Tricyclic antidepressant
Amitriptyline suppresses neuroinflammation and up-regulates glutamate transporters in morphine-tolerant rats **124**, 77
Trigeminal
Increased sodium channel immunofluorescence at myelinated and demyelinated sites following an inflammatory and partial axotomy lesion of the rat infraorbital nerve **124**, 222
Twins
A twin study of posttraumatic stress disorder symptoms and chronic widespread pain **124**, 150
UFP-101
Endogenous nociceptin/orphanin FQ signalling produces opposite spinal antinociceptive and supraspinal pronociceptive effects in the mouse formalin test: Pharmacological and genetic evidences **124**, 100
Visual analogue score
Stimulating the human midbrain to reveal the link between pain and blood pressure **124**, 349
von Frey filaments
Mechanical sensory threshold testing using nylon monofilaments: The pain field's "Tin Standard" **124**, 13
Whiplash
The role of pain coping strategies in prognosis after whiplash injury: Passive coping predicts slowed recovery **124**, 18
Whiplash injury
Physical therapy and active exercises – An adequate treatment for prevention of late whiplash syndrome?. Randomized controlled trial in 200 patients **124**, 69
Withdrawal reflex
Midbrain control of spinal nociception discriminates between responses evoked by myelinated and unmyelinated heat nociceptors in the rat **124**, 59
Y_1
Attenuation of capsaicin-evoked mechanical allodynia by peripheral neuropeptide Y Y_1 receptors **124**, 167

Pain 124 (2006) 371–373

LETTER TO THE EDITOR

Trautmann's neck injury was painful after all
S.W.G. Derbyshire, M.G. Whalley (UK) 234

CLINICAL UPDATES 235

Number 3 – October 2006

EDITORIALS

Reviews: Topical, systematic and once again, comprehensive
A.I. Basbaum (USA) 237
Do hypnotic analgesic interventions contain placebo effects?
D.D. Price (USA) 238
Are we "fear-avoidant"?
J.W.S. Vlaeyen, S.J. Linton (The Netherlands, Sweden) 240

REVIEW

Mechanisms underlying development of spatially distributed chronic pain (fibromyalgia)
C.J. Vierck Jr. (USA) 242

TOPICAL REVIEW

Emotional modulation of pain: A clinical perspective
I. Klossika, H. Flor, S. Kamping, G. Bleichhardt, N. Trautmann, R.-D. Treede, M. Bohus, C. Schmahl (Germany) 264

RESEARCH PAPERS

Investigating acceptance in adjustment to chronic pain: Is acceptance broader than we thought?
M.K. Nicholas, A. Asghari (Australia, Iran) 269
Focused hypnotic analgesia: Local and remote effects
Y. Sharav, M. Tal (Israel) 280
Parental history of chronic pain may be associated with impairments in endogenous opioid analgesic systems
S. Bruehl, O.Y. Chung (USA) 287
Muscle pain in myophosphorylase deficiency (McArdle's disease): The role of gender, genotype, and pain-related coping
O. Rommel, R.A. Kley, G. Dekomien, J.T. Epplen, M. Vorgerd, M. Hasenbring (Germany) 295
Fear-avoidance beliefs about back pain in patients with subacute low back pain
S. Poiraudeau, F. Rannou, G. Baron, A. Le Henanff, E. Coudeyre, S. Rozenberg, D. Huas, C. Martineau, I. Jolivet-Landreau, J. Garcia-Macé, M. Revel, P. Ravaud (France) 305
The evaluation of acute pain in individuals with cognitive impairment: A differential effect of the level of impairment
R. Defrin, M. Lotan, C.G. Pick (Israel) 312

Prevalence of chronic pain seven years following limb threatening lower extremity trauma
R.C. Castillo, E.J. MacKenzie, S.T. Wegener, M.J. Bosse, The LEAP Study Group (USA) 321
General practitioners' fear-avoidance beliefs influence their management of patients with low back pain
E. Coudeyre, F. Rannou, F. Tubach, G. Baron, F. Coriat, S. Brin, M. Revel, S. Poiraudeau (France) 330
Effects of subcutaneous administration of glutamate on pain, sensitization and vasomotor responses in healthy men and women
P. Gazerani, K. Wang, B.E. Cairns, P. Svensson, L. Arendt-Nielsen (Denmark, Canada) 338
Stimulating the human midbrain to reveal the link between pain and blood pressure
A.L. Green, S. Wang, S.L.F. Owen, K. Xie, R.G. Bittar, J.F. Stein, D.J. Paterson, T.Z. Aziz (UK) 349

LETTERS TO THE EDITOR

Comment on Stanford EA et al.: The role of developmental factors in predicting young children's use of a self-report scale for pain. Pain 2006;120:16–23
G.D. Champion (Australia) 360
Response to the Letter to the Editor by David Champion
E.A. Stanford, C.T. Chambers, K.D. Craig (Canada) 361
